Contact: contact@ipsip.pl, kbp@igf.edu.pl

Photos: P. Andryszczak, G. Błak, E.P. Łepkowski

Participation fee

(coffee breaks lunches and icebreaker reception included):

Early (by 6 October 2017)

Senior scholars – 180 € Early career scientists and students – 80 €

Regular

Senior scholars – 200 € Early career scientists and students – 100 €

Conference Dinner – 25 €

Accommodation on wide scale of prices will be recommended by the organizers.
Social program including guided sightseeing of Warsaw will be offered.

Hornsund Station Operator:

Arctowski Station Operator:

HORNSUND

Polish Polar Station

1957-2017

We are pleased to announce and invite to the International Conference
INTERDISCIPLINARY POLAR STUDIES IN POLAND

to Honor

**60th ANNIVERSARY OF THE POLISH POLAR STATION IN HORNSUND,
SVALBARD, ARCTIC**

and

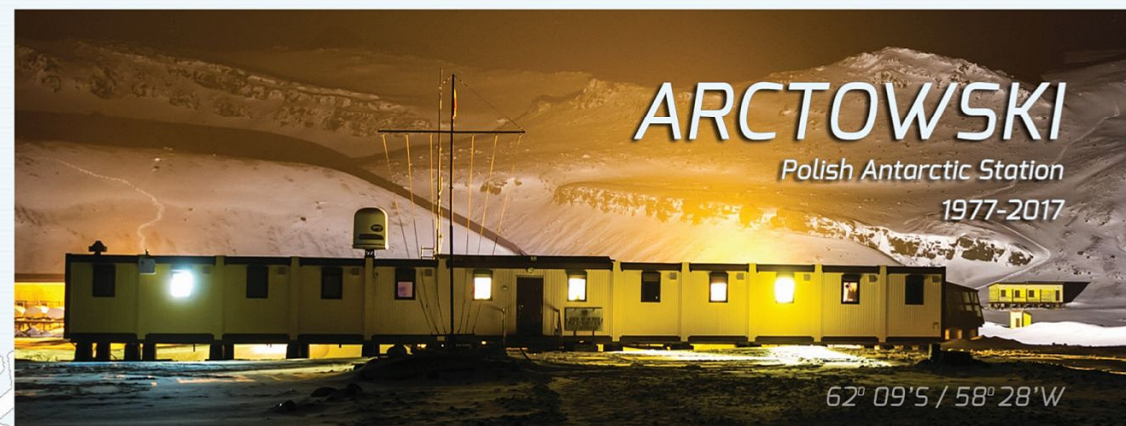

**40th ANNIVERSARY OF THE ARCTOWSKI POLISH ANTARCTIC STATION,
SOUTH SHETLAND ISLANDS**

Warsaw, Poland, 17 - 19 November 2017

ARCTOWSKI

Polish Antarctic Station

1977-2017

ARCTOWSKI

Polish Antarctic Station
1977-2017

On 26th February 1977, the **Henryk Arctowski Polish Antarctic Station** officially began its activity on and has been functioning unceasingly until now. The scope of scientific inquiries being conducted at the station include: ecology, microbiology, oceanography, geology, geomorphology, glaciology, hydrology, meteorology and seismology. Infrastructure of the station includes also refuges and field camp. The station was operated by the Department of Antarctic Biology of the Polish Academy of Sciences (PAS) which has been incorporated into the Institute of Biochemistry and Biophysics PAS in 2012.

We invite contributions to the IPSiP Conference on any aspects of studies in the polar regions, including focused on empirical, theoretical, and methodological topics for a better understanding of Arctic and Antarctic environment. Syntheses, reviews and case studies on feedbacks at the litho-, atmo-, hydro-, and biosystems interface are mostly welcome. Plenary and breakout sessions are planned.

Special invitation is directed to scholars and students who conducted their field research using the Hornsund and Arctowski stations.

Early career scientists and postgraduate students are warmly encouraged to participate.

The **Polish Polar Station Hornsund** was built in 1957 in South Spitsbergen, in the region often called "Gate to the Arctic". The location is very favourable for multidisciplinary research and monitoring of geophysical fields and polar environment. Nearby glaciers are studied by manifold methods and comprise an international research site for better understanding of their state and interactions with climate. The Station has been named after Professor Stanisław Siedlecki. This modern scientific platform composed of a few buildings and other infrastructure operates year-round since 1978 being managed by the Institute of Geophysics PAS.

INTERDISCIPLINARY POLAR STUDIES IN POLAND - IPSiP

General programme

17th November (Friday)

11.00 -13.00 - Opening and Jubilee Session
Lunch
14.00 – 18.00 – Plenary lecture and scientific sessions
Icebreaker

18th November (Saturday)

9.00 – 18.00 - Plenary lectures and breakout scientific sessions
Conference dinner

19th November (Sunday)

9.00 – 13.00 - Plenary lectures and breakout scientific sessions. Closing session

NEW ! Important dates

Abstract submission extended to 6 October 2017

Notification on abstract acceptance by 16 October 2017

The second circular with the conference program in October 2017
